Overview

Medium Camera Link, 10 μm pixels and resolution from 2k to 4k with proven performance.

Piranha 2 delivers superb performance with a wide selection of resolutions. Medium Camera Link with four 8 or 10 bit outputs at 40 MHz deliver 160 MHz throughput, and boosted responsivity means the Piranha 2 needs less light. Our 4 tap, 10 μm models are available in resolutions from 2k to 4k.

The camera is small, light, and uses a single power supply. Cabling and interface are simplified with the Camera Link™ high speed serial standard. The camera is very sensitive, but still provides quieter, more uniform output thanks to CDS (correlated double sampling) and embedded flat field correction algorithms. Gain and offset are fully programmable for each output channel, and the camera can output test patterns for cable/system troubleshooting.
